

COMENIUS INTERNATIONAL WEEK IN BARCELONA:

Applying new ICT tools at schools: Educational apps, robotics and 3D printing

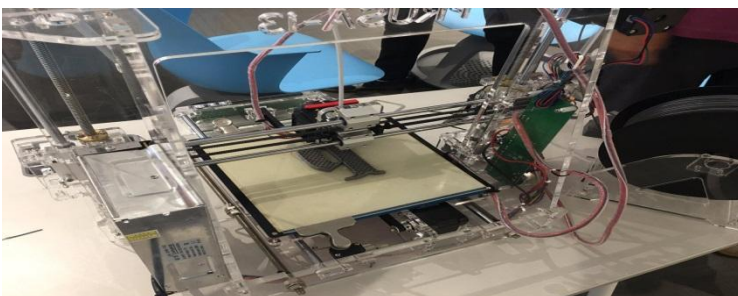

16th-20th April 2018

Presentation

Educational technology has become a great tool for schools and teachers in all European countries. Technologies have contributed to improve our teaching practices, but we have not explored yet all the opportunities. The educational apps, robotics and 3D printers are motivating tools that promote, facilitate and enrich learning.

During your stay in Blanquerna you will have the chance to visit some of the pioneering schools in ICT. These visits, along with some workshops and conferences will help you understand in a practical way the opportunities that ICT offer for teaching and learning.

Goals

- To participate and exchange experiences and knowledge with students and teachers from different universities and countries
- To get to know the ICT tools and their implementations through workshops and visits to schools
- To discover some outstanding places of Barcelona and the Catalan culture

Program

Monday	Tuesday	Wednesday	Thursday	Friday
Welcome Meeting Working plan presentation Group Dynamics Introduction to the Catalan Educational System and the Role of ICT in schools	VISIT TO SCHOOLS	Working session Workshop 2 Applying robotics in schools	VISIT TO SCHOOLS	Working session Outcomes Presentation Assessment of the week
